## **ESG Framework**

#### **ISPO Certification**

TBLA plantation and mills are adhering to strict ISPO guidelines.

Championed ISPO certification for all our plantations and production facilities.

### **Green Energy & Recycle**

Reduce carbon emissions through the operation of two biogas power plants in Lampung.

All CPO & sugar mill/s and sugar mills use biomass for power generation.

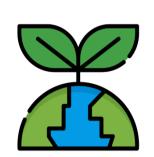

Active participant in Biodiesel initiative. which is a sustainable substitute for regular petroleum.

### **Social Contributions**

Uplift local economy through local cooperatives under the Plasma Program.

Partnering with locals landowners in the conversion of utilized land into productive incomegenerating plantation.

### Sustainability

Apply Good Agricultural Practices (GAP) such as strict zero burning policies.

Maintains a high standard of sustainability practices, for new plantation development and management of existing plantations

# **ESG Applications**

### Enhancing Sustainability with Eco-Friendly Technologies

### METHANE CAPTURE

Utilizing Palm Oil Mill Effluent (POME) to capture methane gas. Effective in not only reducing greenhouse gas emission, but also provide alternative energy. One 60 ton/ hour CPO mill could reduce carbon emission by around 791 ton of C02/annum.

### **ZERO WASTE**

TBLA's compost factory utilize all waste from our CPO mills, especially oil palm empty fruit bunches. This is in line with our "zero waste" policy.

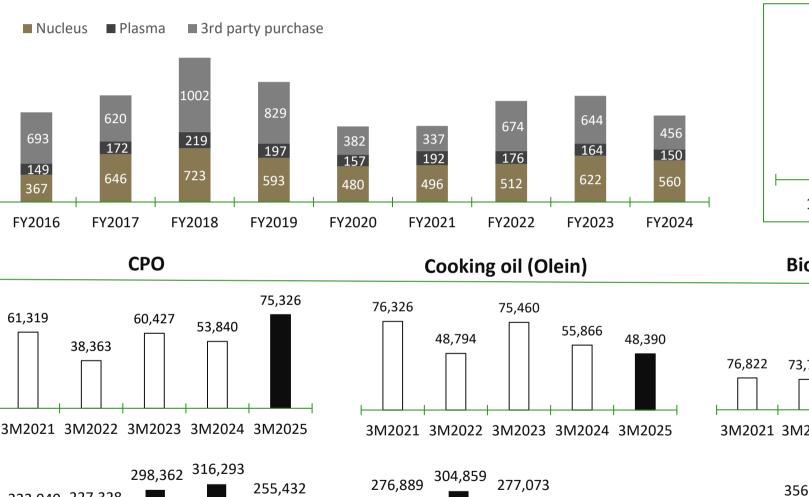

### **BIODIESEL PRODUCER**

TBLA is one of the primary participant in Indonesia's biodiesel effort, which has been very effective in reducing greenhouse gas emission, especially from transportation sector, which estimated to be around 24 million ton of CO2 in 2021<sup>1</sup>.
